

SCF1 expression across 8 orbit LLM reanalysis attempts (Santana 2023 C. auris)

A. SCF1 log2FC across attempts

B. SCF1 expression collapse vs the naive-ID trap (gpt2 data)

* gemini & gemini-3.5-flash reported the inverse sign (WT as numerator); normalized here so down-in-mutant/AR0387 is negative. sonnet & gpt2 are bit-identical (same IWC rnaseq-pe/de workflow). haiku & gpt (1st attempt) produced no expression result.
